

This monthly newsletter is a brief overview of Ukrainian authorities' work on implementation of Reform #1 in Ukraine

### DECENTRALIZATION IS ALREADY 46% COMPLETE

On June 12, during the first meeting of the Regional Development Council under the President of Ukraine the results of local self-government reform implementation were presented. According to Ukrainian experts and foreign specialists, the reform is 46% complete.

Throughout the year important legislative changes were adopted. Particularly, thanks to budgetary and tax decentralization, during the first quarter of 2015, revenues of local budgets increased by 5.5 billion UAH and amounted to 21 billion UAH. Draft prospective plans of formation of capable communities have been developed in all oblasts of Ukraine, and more than 50% of them are already approved by oblast councils.

"We already see the first results of the reform. The next important step is to introduce respective amendments into the Constitution of Ukraine. Without them we will be unable to move on and implement the reform in full",

### THE CONSTITUTIONAL COMMISSION ADOPTED THE DRAFT LAW ON INTRODUCTION OF DECENTRALIZATION AMENDMENTS TO THE CONSTITUTION OF UKRAINE

On June 26, the Constitutional commission adopted the draft law on introduction of decentralization amendments to Ukrainian Constitution. The draft law will be presented for consideration to the President of Ukraine.

Earlier, on June 24, the Venice Commission commented approvingly on the draft amendments. "The draft amendments introduce a form of decentralisation in the exercise of state power which is largely compatible with the European Charter of Local Self-government. Overall, the amendments are well drafted and deserve support." The draft amendments clearly differentiate the competencies of local self-government and the state. This

is a new approach for Ukraine as a post-Soviet state.

The draft law provides for creation of executive committees at raion and oblast levels; specific financial instruments are assigned to local self-government bodies, while their authority is clearly defined.

The draft law provides for elimination of local state administrations. New bodies with control and coordination functions shall be formed instead. A system will be created, which makes it impossible to violate the rights of people.

"Amendments introduced into the Basic law should make the process of democratic transformations in Ukraine irreversible. The citizens of Ukraine wait for intensive progress of reforms and for urgent approval of the decisions which are crucial for state construction",

**said the Chairman of Verkhovna Rada, Volodymyr Groysman.**
